SPECIAL CATALOG EDITION—Shenandoah, Iowa, Jan. 1, 1940

The Spot Business Is Rushing

Never saw any business boom the way our Spotted Poland China pigs are going. We're shipping hundreds all over the country and the interesting part is they are mostly sold sight-unseen and we haven't had a complaint. They like our spots. Of course we'd rather have you come here to pick out what you need, but if you can't, we can take care of you and make you happy by long distance.

These are a few of our fall pigs on our Sleepy Hollow farm. Every one of them are thick, easy-feeding, farmer-type pigs—the kind packers want. They're the thick, wagon-box kind that make money—the kind you want and the only kind we have for sale. It's foolishness feeding cheap pigs with our registered Spotted Polands at our low Farmer prices.

For some Low Spot prices see page 4.

At Last! Buffalo Grass for Lawns

There is something new under the sun after all—and we have it right here in this beautiful new lawn grass—Buffalo grass. The picture shows it growing down at our No. 2 warehouse. Did you ever see such a beautiful flat carpet. It grew like that from about two hundred little plants we set out a year ago. It loves dry weather, spreads by runners, never gets tall enough to need mowing, holds its green color over all the dense mat it makes on the ground.

Folks have been begging us for a start of it, so we've finally decided to sell a limited amount (in sod form for better shipping):

- 1 sq. foot of sod (275 plants—enough for 200 sq. ft.)\$1.00 postpaid
- 2 sq. feet of sod (550 plants—enough for 400 sq. ft.)\$1.89 postpaid

This is all carefully packed in moss and shipped prepaid. You break the sod and set plants a foot apart. Full directions with each shipment. Very little more expensive than bluegrass, but so much more satisfactory.

The tall plant in the background is Blue Stem—the native prairie grass. We have native genuine Blue Stem the hardy drought-resistant strain for only \$14.95 per 100 lbs. of seed. You farmers know pastures in this country need it badly.

Another Case Where Mule-Corn Outyielded State Hybrids

This is R. A. Robbins of Castana, Iowa who sent in this picture of Mule-Hybrid No. 116 with four good ears on one stalk. He said "Your Mule-Corn yielded 85 bu. per acre compared with 75 bu. per A. for Iowa 939 and for my open-pollinated corn. What impressed me most was that every stalk bears its share of corn. None of this corn was down while some of the open pollinated corn fell and the ears from the hybrid did not drop as easily as from the other corn."

By the way—don't fail to get your hybrid corn order in before Feb. 20. Bookings are so heavy for Mule-Hybrid this year that I want you to be sure and get the variety you want before we're sold out as well as the low price that ends Feb. 20. See page 52 and 53.

WANTED: 20,000 BOYS and GIRLS in the Seed Business with Me

A CHANCE TO WIN PREMIUMS OR CASH

You boys and girls these days are looking for a chance to make money and win big prizes. I'm going to help you by getting you in the Seed business with me.

I will furnish the seeds for your start and give you a big share of the profits. I have had as high as 30,000 JUNIOR SEEDSMEN on my list and want 20,000 more now.

You know I started in business for myself selling seeds when I was probably younger than you are now. You have read about it in the catalog. But I didn't get very far at that time, for I had very few seeds to sell and no money to buy more with, and no one to start me in business. I wish I could have had the chance you now have. I would have got a good start in the seed business about ten years earlier than I did.

EVERYONE WANTS A BARGAIN COLLECTION LIKE THIS

This year we're offering the best and most popular collection we have ever put out. It's just what everyone wants. A **WHOLE GARDEN FOR 39c**. 10 giant packets of garden seed in each collection for only 39c. Think of it! Everyone will gladly buy a bargain like this.

Now what I want you to do is sell these seed collections to your friends and neighbors. All you need to do is fill out the application blank below and return it to me and I will send you ten of these collections; then after you have remitted for them I will gladly send you some more if you can use them. A great many of the Junior Seedsmen sold as high as ten or twelve sets and there is no reason on earth why you shouldn't do equally as well if you get an early start. I know you are honest, and I am willing to trust you, and then when you have sold the collections we will divide the profits. How does that suit you? Henry Field.

HERE'S MY PROPOSITION

1. Fill out the coupon below and send it to me and I will send you at once by parcel post 10 of the 39c collections for you to sell. You need not send the money till they are all sold, but if you do not sell them within a month, you are to return them.

2. When you have sold ten collections you get one-fourth (\$1.00) the total for your share, either in cash or one of the premiums. By buying these premiums in big quantities and getting the manufacturers interested in my plan for starting boys and girls in business, I have made your one-fourth cover the wholesale cost of each one.

3. You send me the \$3.90 you receive for the 10 collections and tell me which premium you want, and I will send it to you at once by parcel post, except in the case of some expensive premium requiring a little more work.

4. If you would rather have your share in cash, keep out one-fourth and send the rest to me. I trust you to do the dividing.

5. In case you cannot sell the 10, sell all you can, return the rest by mail, keep one-fourth of the money and remit the rest.

6. The collections must all be sold at the same price, 39c. We believe in one price to everyone. It's the only way.

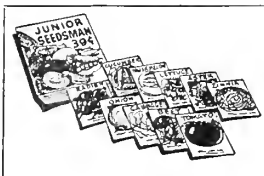

DON'T WAIT

Don't put off until some other Junior Seedsmen has supplied your neighborhood. Get an early start and you'll sell more, easier. H. F.

Stringless Yellow Pod Perform

Here's Miss Clara Hellwig of Helvey, Nebr. with a picking of my Stringless Yellow Pod for canning. I guess that shows how they perform.

About Beans

I believe every family should plant at least five or six pounds of beans. (See my special 3 pound prices.) I always have a good supply of seed beans handy. Whenever any of the early or midseason things run out, I fill in the spaces with beans.

A pound will plant two rows 50 feet long. Start your plantings as soon as severe frosts are over and plant every two weeks until the middle of July. You will have fresh, crisp beans all season. Beans like a rich, warm soil.

For late pickles, plant in June.

THIS IS THE FAMOUS HOLLOW CROWN PARSNIP

THE BEST IN MUSKMELONS

I'm proud of my muskmelon seed. I don't believe there is another seedsman in the country who has spent as much time fussing with the growers, inspecting crops and worrying about his melon seeds. Every variety is grown by a specialist in an isolated place where it doesn't get a chance to mix with anything else. Plant them after the ground is warm. Figure about three dozen hills for one packet of seed or 100 hills from an ounce. Give them plenty of room, at least 6 to 8 ft. each way.

It's Cuckoo! But It Works
Here's an idea you might try. Mrs. Herman Knoch of Davis, South Dakota, says, "Here are our sons, Floyd and Lloyd and Clyde shelling some of Field's good Dwarf Laxtonian Peas. I thought they were cuckoo when they dragged out the washing machine to shell peas through the wringer, but it worked. They shell them all that way. Accompaniment was a whistle instead of a groan."

Got Any Ideas?
That idea for shelling peas gives me one. Why don't you folks send me some of those labor saving ideas you have. I'll save them and put them in Seed Sense sometime.

PEAS

My seed peas are northern grown, the quality is exceptionally good, and they are free from weevils. The best that grows. Plant the smooth varieties just as soon as you can get into the ground. The wrinkled varieties should be planted a little later. If you want to try a fall crop, use the early sorts, planting them about the middle of August. One pound of seed will plant a row 50 feet long. Peas should be inoculated for bigger crops. Large Pkt. inoculation 10c, postpaid.

NOW! HYBRID SWEET CORN

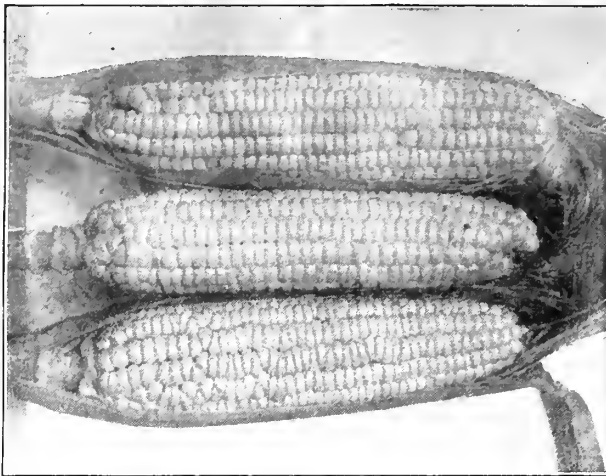

- SWEETER
- MORE TENDER
- LARGER
- HEAVIER YIELDS
- DISEASE RESISTANT

WHAT HYBRID SWEET CORN IS

Everybody's planting HYBRID Sweet Corn now. It's more tender, earlier, sweeter, MUCH HEAVIER YIELDER and disease resistant.

Just like Hybrid field corn, the hybrid sweet corn more than pays in increased yields for the cost of the seed. And it TASTES so much better.

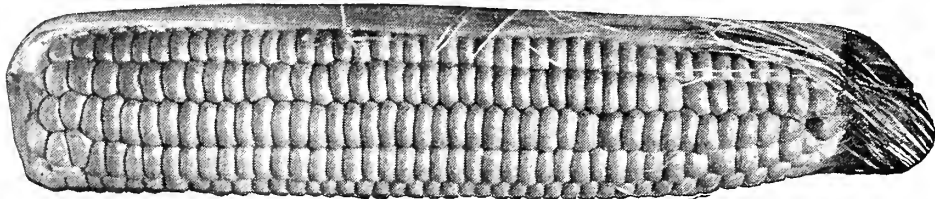

Plant some of all this year. These are the best of 60 hybrids checked in our trial grounds. H. F.

GOLDEN CROSS BANTAM HYBRID

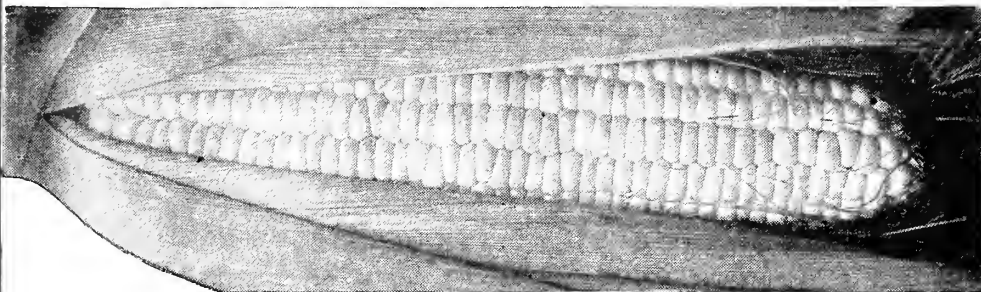

12 to 14 Rows Sweet, Tender Kernels

171 (85 days.) A great big Golden Bantam. It has 12 to 14 rows of kernels, quality exceptionally fine, noted for its uniformity. Strong vigorous grower, resistant to smut, ears are 8 inches long. About a week or 8 days later than the regular Golden Bantam. Fine for canning and is exceptionally good where large ears are wanted. Price: Triple size pkt. (3 oz.) 15c; 1/2 lb. 26c; 1 lb. 45c; 3 lbs. \$1.15, postpaid.

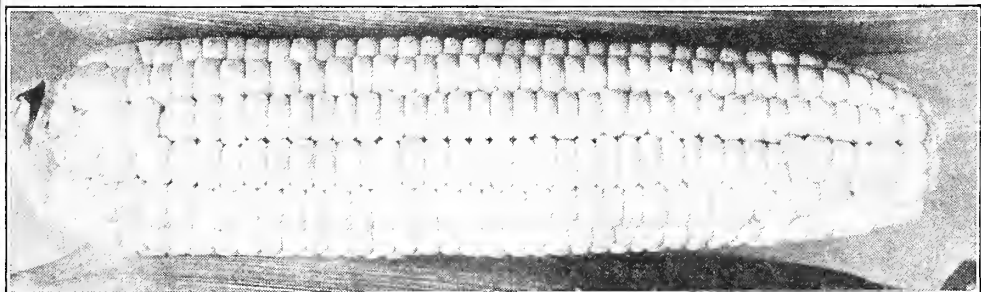

EARLY GIANT GOLDEN BANTAM HYBRID

178 (65 days.) It was the earliest variety in our trials and we had over 60 different Hybrids there too. Ten days earlier than the ordinary Golden Bantam. Stalks are 4 to 5 feet tall, are heavy, vigorous growers, stand up well, ears are 6 to 7 inches long, rich yellow in color, 2 ears to the stalk. Kernels are long and plump, 12 row variety, quality can't be beaten. A fine market sort for earliest market. Price: Triple size pkt. (3 oz.) 15c; 1/2 lb. 26c; 1 lb. 45c; 3 lbs. \$1.15, postpaid.

GIANT BANTAM HYBRID

175 (75 days.) This variety was developed especially for the canning trade. About 4 days earlier than the Golden Bantam, open pollinated, runs almost 100% 10 to 12 rows to the ear, ears 7 inches long, very uniform, resistant to smuts and to root diseases. Finest in the lot for canning purposes. Price: Triple size pkt. (3 oz.) 15c; 1/2 lb. 26c; 1 lb. 45c; 3 lbs. \$1.15, postpaid.

HYBRID STOWELL'S EVERGREEN

THE Heavy Yielding White Corn

184 (97 days.) A deepkerneled hybrid, the result of many years of breeding and crossing. Probably the heaviest yielder of sweet corn there is. Stalks 7 1/2 to 9 feet tall, ears 14 to 18 rows, about 8 inches long. It outyields the ordinary Stowell's Evergreen and is much better in quality, unexcelled for canning. Price: Triple size pkt. (3 oz.) 10c; 1/2 lb. 25c; 1 lb. 40c; 3 lbs. \$1.10, postpaid.

HYBRID SWEET CORN MIX

Gives You Sweet Corn All Season Long

3 Oz. Only 10c

A special blend of all my MULE HYBRID Sweet Corns, so you'll have corn ripening SOME EACH WEEK ALL SEASON. No need to make 4 or 5 plantings. You'll have corn from the earliest (about 60 days) to the latest (about 115 days). I used Hybrid Sweet Corn as it's the coming thing—sweeter, more tender, deeperkerneled, disease resistant.

SWEET CORN

Wait until the ground is warm before planting any of the later varieties. The early varieties may be planted a week or two sooner. 1/2 lb. of seed will plant 100 hills or about 10 to 12 lbs. to the acre. Plant at intervals of ten days until the middle of July for new corn all summer.

COUNTRY GENTLEMEN

The Tender White

Heavy producer. Fine for canning. Price: Triple size pkt. (3 oz.) 10c; 1/2 lb. 17c; 1 lb. 29c; 3 lbs. 75c, postpaid.

STOWELL'S EVERGREEN

The Giant White Corn

188 (96 days.) Don't try to make gardens without this one. Standard variety for both home and market gardener. Plant this one for canning and drying as well as for the roasting ear season. GOLDEN BANTAM

Favorite Yellow

182 **GOLDEN EARLY MARKET.** (70 days.) Large eared early. Exceptionally fine, extra early open pollinated Golden Sweet corn. Has 12 rows of kernels, ears 6 to 7 inches long, quality is good. Tender and very sweet, has a long husk which protects it well from the ear worm. Four days ahead of Golden Bantam. Market growers go for this one. Price: Triple size pkt. (3 oz.) 10c; 1/2 lb. 17c; 1 lb. 29c; 3 lbs. 75c, postpaid.

179 **GOLDEN COUNTRY GENTLEMEN.** (92 days.) Shoe Peg—largest of all. The one I used to talk so much about last spring. A glorified golden Country Gentlemen. Sweetest and finest flavored corn grown. 172 **SILVER BANTAM.** (78 days.) Early White Golden Bantam. An unusually early, fine white sort. Somewhat earlier than the Golden Bantam, but otherwise very similar in both shape, size and quality. It is a splendid variety and fully as good as the golden sort. Price: Triple size pkt. (3 oz.) 10c; 1/2 lb. 20c; 1 lb. 28c; 3 lbs. 75c, postpaid.

187 **TRUCKERS FAVORITE.** (85 days.) Southern Sweet Corn. This really isn't Sweet Corn but down south they can't grow Sweet Corn very well and this one will grow in spite of ear worms, drought, heat or most anything else. Ears are large—7 to 9 inches long, carrying 12 to 16 rows of kernels, stalk is very vigorous, usually 8 feet tall, matures about 104 days from planting to roasting ears. Price: Triple size pkt. (3 oz.) 10c; 1/2 lb. 17c; 1 lb. 25c; 3 lbs. for 65c, postpaid.

TOMATOES

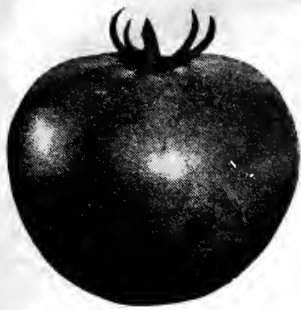

I've tried out a lot of different varieties of tomatoes and I've discarded all but the best of them. These varieties are the pick of the lot, over a period of the last 40 to 50 years. My seed stocks are extra select, pure, uniform, and they have to be right. Plant both early and main crop sorts, so you will have plenty.

NEW STONE

Standard Main Crop

415 (116 days.) A great main crop variety for canning and general use. Solid, smooth, ripens evenly. Bright scarlet, a good yielder. Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

OXHEART

409 (90 days.) Entirely different from any other kind of tomato. Large heart-shaped, pink-skinned variety. The flesh is thick but very tender. It has few seeds. Somewhat late and a great deal after the style of Ponderosa. Has a distinct, appealing, mild flavor. Price: Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.00, postpaid.

FIELD'S FAMOUS EARLY RED HEAD

Early—Heavy Yielding—Doesn't Crack

401 (76 days.) I introduced Red Head a good many years ago. Since then we have been constantly working on it to make it better. I will put it up against any other variety. It is a heavy yielding sort, bears over a long time. The tomatoes are round and smooth, they ripen evenly, and very seldom crack. The firm flesh makes it a fine canning sort. Price: Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.00, postpaid.

SNOWBALL TOMATO

403 (78 days.) Snowball is an ivory white tomato with flesh almost white. Most as big as Ponderosa—in fact it belongs to the Ponderosa family. Has few seeds and practically no acid. Lots of folks who were unable to eat tomatoes before can enjoy them now that we have this fine new Snowball. Every garden should have a few of them. Price: Pkt. 10c; ½ oz. 60c; oz. \$1.00, postpaid.

SCARLET SLICER

Drought Resistant Heavy Yielder

410 (70 days.) (See colored picture on cover.) Here's the new one for you. It's deep red fleshed. It's heavy foliage helps it to withstand drought and hot winds. It's the ideal slicer (very round and smooth) and is good for canning too. Special price: Pkt. 14c; ½ oz. 20c; oz. 39c, postpaid.

FIELD'S RED BIRD

421 (70 days.) Next to Red Head, I claim this is the finest early tomato I have ever found. It is another one of my own introductions. Grows to a medium size, round, very smooth and seldom cracks. The color is a beautiful bright red. It is a dandy in every way. Price: Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.00, postpaid.

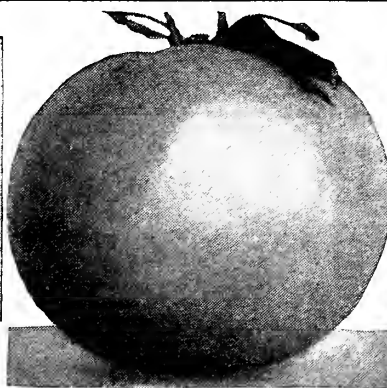

PEAR TOMATO

The old fashioned pear shaped preserving tomato. Fruit is borne in clusters.

405 (115 days.) Another dependable wilt-resistant main crop. Vigorous grower, medium large, nearly globe shaped, smooth and solid. The quality is extra fine, and it is an outstanding tomato for canning. Deep scarlet. Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

SCARLET CLUSTER

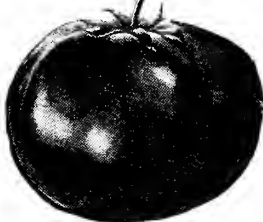

413 (110 days.) We introduced this one two years ago. It's everything that a gardener might hope for. Good sizes, smooth, brilliant scarlet color throughout with thick flesh and small seed cavity. Ripens from the inside out and doesn't crack. Price: Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.25, postpaid.

FIELD'S EARLY JUNE

Good and Early

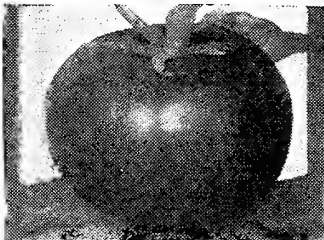

402 (66 days.) Another good extra early one. Not as large as some and doesn't yield as much as some but makes it up on earliness. Medium size, rounding, flat, dark red, fine for slicing. Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

EARLIANA

Very Vigorous

411 (66 days.) One of the best of the early red tomatoes. Vigorous, spreading vine, bearing bright scarlet, medium size, nearly globe shape fruit, in clusters. Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

RUTGERS

Likes Drought

417 (110 days.) I found this one in New Jersey. After trying it out here for a couple of years, I am ready to believe that it deserves a place in every garden. It starts ripening on the inside, and you can depend on it being thoroughly ripe all the way through. Doesn't have a hard core, and is outstanding for its uniform deep red coloring. Flesh is firm. Globe shaped. An excellent canning variety. Price: Pkt. 5c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.25, postpaid.

GOLDEN BEAUTY

412 (82 days.) Large main crop yellow variety. Quite a novelty but well worth having. I like it. It's smooth medium size, mid-season to late, fine for preserves or for table use. Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

BREAK O'DAY

Disease Resistant

TREE TOMATO—(Dwarf Champion)
Tomatoes on Trees!

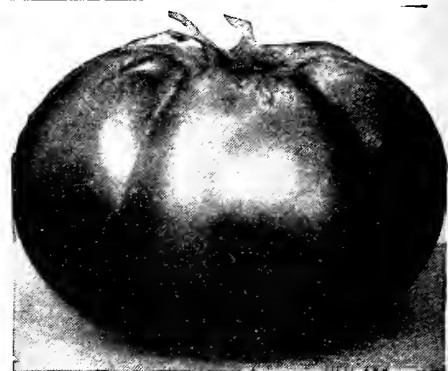

414 (83 days.) There's been a big fuss about this Tree Tomato. It grows vigorously and is stocky, making a small tree loaded with tomatoes. Medium to late, fruits pink, grow in clusters, rather flat, globe shaped, good bearer. Price: Pkt. 10c; ½ oz. 15c; 1 oz. 25c; ¼ lb. 80c, postpaid.

PRITCHARD

Resistant to Wilt and Disease

423 (112 days.) A new wilt-resistant variety. I tried it out both here in the trial grounds and in my garden in Missouri, and taking it all the way around, it is the finest main crop tomato I know of. The fruits are very solid and heavy, smooth globe-shaped, a rich deep scarlet color and mild flavor, and fine for tomato juice. It has distinct topping habit and can be planted closer together than most sorts. Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

PONDEROSA

Largest of All Tomatoes

418 (86 days.) Here's one you can't beat. It is too tender and doesn't hold up well for market but for home use there's nothing like it. The fruit is large, sometimes inclined to roughness, but very tender and meaty. Slices beautifully with few seeds. Vigorous grower. Price: Pkt. 5c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.00, postpaid.

My Famous SUGAR LUMPS

Yes, the boss himself looking over a good bunch of my Sugar Lump Melons. Believe me—I'm pretty popular when they get ripe.

VERY EARLY

This new strain is the earliest I've found yet. Some are ripe by June 30. All varieties ripe by July 10.

"ICE BOX" SIZE

All of the varieties are individual size, about 8 or 9 inches through. Fit in an ice-box without cutting. No slice left over to get tough.

SWEET AS SUGAR

Sweetest ever. That's why Mrs. Field asked me to call them "Sugar Lumps."

NOW BY COLOR

This is the first time I've ever offered the separate colors, but so many of you wanted them that way, here they are:

Choice 19c Pkt.; Oz. 45c

724 **YELLOW SUGAR LUMP.** Golden yellow, flesh very sweet.

725 **WHITE SUGAR LUMP.** If you've never tasted a white melon, here's a treat for you.

WATERMELON HEADQUARTERS

I want every farm to have a big watermelon patch. Even the backyard gardener should raise a few hills of them. Nothing will make the boys happier than a good melon patch of their own. My melon seed

comes from fields grown especially for seed crops. Melons like warm loose soil. Give them plenty of room, at least 10 feet each way. Figure about 50 hills from an ounce of seed, or 3 pounds to the acre.

KLECKLEY SWEET Standard Long Melon

704 (85 days.) Probably the best known melon in America. The measuring stick by which all other varieties are compared. Large, cylindrical in shape. Weighs around 35 lbs. Dark green, flesh bright red. Very tender and sweet. Price: Pkt. 5c; oz. 8c; ¼ lb. 20c; 1 lb. 55c, postpaid.

WILT RESISTANT KLECKLEY

706 **KLECKLEY SWEET No. 6.** (90 days.) Originated by the Iowa State College to take the place of Pride of Muscatine. It has all the good qualities of Kleckley, plus the resistance to wilt, and similar diseases. Doesn't grow bottle-necked, stands handling and shipping well. Flesh is bright red, tender and extremely sweet. Price: Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 70c, postpaid.

STONE MOUNTAIN

Standard Large Round

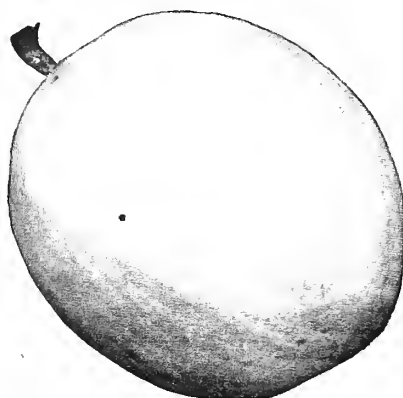

714 (85 days.) A great big melon, almost round. Weighs 50 lbs. in a good year. The rind is hard and tough, dark green, stands handling well. Very sweet in flavor, a bright sparkling color. Price: Pkt. 5c; oz. 8c; ¼ lb. 20c; 1 lb. 60c, postpaid.

WILT RESISTANT STONE MOUNTAIN

723 **STONE MOUNTAIN No. 5.** (85 days.) A new wilt resistant strain of the Georgia Stone Mountain. It has all the good qualities of the regular strain and in addition, will grow on wilt infested soil. Price: Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c, postpaid.

GOLDEN QUEEN

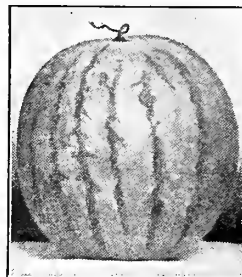

Yellow Outside—Red Inside

718 (85 days.) Yes Sir, it's a golden-yellow watermelon—that is the rind is a rich golden-orange yellow in color. The flesh of course is red just like the regular watermelon. Its flavor is unusually good, it eats most as well as Sugar Lump too. If you want something the other fellow doesn't have, get a packet of Golden Queen. The seed is limited, so order early. Price: Pkt. 15c; oz. 25c; ¼ lb. 75c, postpaid.

FIELD'S FOURTH OF JULY

Ripe by July 4th

708 (70 days.) 20,000 of my customers swear by this melon year after year. One of the earliest melons grown. Average weight 8 to 10 lbs. Color is a deep green, marked with lighter stripes. Rind is exceptionally thin (not over ¼ inch). Flesh is dark red, tender, fine grained, unusually sweet and rich. Price: Pkt. 10c; oz. 19c; ¼ lb. 50c; 1 lb. \$1.50, postpaid.

DIXIE QUEEN

A Good Shipper

722 (80 days.) A recent introduction. It is a great shipper, and a fine melon for the home garden. It produces an unbelievable number of melons. The flesh is crisp and tender and has the fewest seeds of most varieties. The rind is thin, but tough. The color is striped light and dark green. Deliciously flavored, rich color. Price: Pkt. 8c; oz. 15c; ¼ lb. 40c; 1 lb. \$1.00, postpaid.

KANSAS SWEET

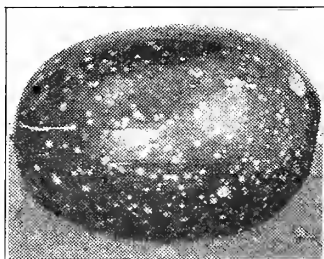

The Perfect Market Melon

716 (85 days.) A new, big round melon that looks like the old Kolb Gem. Has thin rind, light green with broad dark green irregular stripes. The flesh is solid red, and the seeds are buff color. Price: Pkt. 7c; oz. 15c; ¼ lb. 30c; 1 lb. 90c, postpaid.

MOON AND STARS

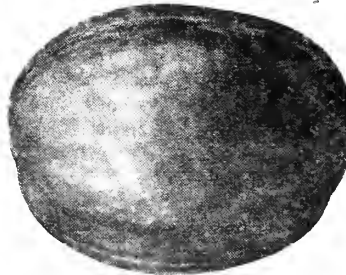

A Novelty Worth Planting

712 (85 days.) Quite a curiosity. Dark green, oblong variety with yellow spots an inch or more across which represent the moon, with many small yellow spots around it, representing the stars; hence the name. The quality is good and it's well worth planting. Price: Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. 90c, postpaid.

STATE FAIR MELON

The Melon I Win My Prizes With SEED VERY SCARCE

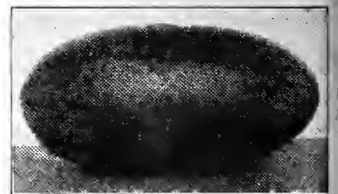

701 (90 days.) This is the big Jumbo kind that you saw at my Jubilee. I used to take them around to the State Fairs and challenge anyone to raise bigger ones. They mature nicely here in this section. Melons often weigh 100 pounds or more. I have seed enough for only about ½ of the season. I ask that you please order early so you won't be disappointed. Price: Pkt. 15c; oz. 25c; ¼ lb. 60c, postpaid.

BLACK SEEDED

KLONDIKE

Keeps Well

705 (90 days.) I recommend it highly. It carries the highest sugar content of any melon that I know of. Oblong, medium size, dark green rind, and small black seeds. The flesh is a beautiful sparkling, deep red, very crisp and tender, without a trace of strings. Price: Pkt. 5c; oz. 15c; ¼ lb. 35c; 1 lb. 60c, postpaid.

ICE BOX PRINCESS

717 (85 days.) Nowadays that everybody has an ice box, they are looking for a small-sized melon to fit it. It is just the right size to serve one person perfectly. Flesh is a clear red, clear to the rind. Rind is very thin. It's sweet and of the finest quality. My stock seed originally came from Hungary. Price: Pkt. 5c; oz. 15c; ¼ lb. 30c; 1 lb. 90c, postpaid.

CLIMBING WATERMELON

703 (82 days.) I took a lot of kidding over the picture of the Climbing watermelon in my last year's catalog. Well, all I've got to say is this: Plant some of them along your garden fence and see for yourself. They start bearing early and continue to bear all season. Melons weigh from 4 to 6 lbs. and are very sweet. It is an apple seeded variety. Price: Pkt. 10c; oz. 25c; ¼ lb. 70c, postpaid.

GOLDEN HONEY

702 (90 days.) A beautiful yellow-fleshed melon that makes a novel home or market sort. Large, oblong shape, weighing around 20 lbs. Rind dark green, with irregular stripes. Flesh a tender, crisp, delightfully flavored bright yellow. Price: Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.00, postpaid.

WATERMELONS MIXED

This is a specially fine mixture for a boy though I sell thousands to folks who haven't been boys for a long time. It's a thorough mixture of 25 kinds so you have all sorts at all times. Find room for at least a quarter pound and you'll be tickled pink with the melons. No. 710—Big packet (over 1 oz.) 9c; ¼ lb. 25c, postpaid.

Large Pkt. 9c

POPCORN PEANUTS

GIANT POPCORN
197 (110 days) **SOUTH AMERICAN (ARGENTINE GIANT)**. Here's the giant. Pops out in large, creamy-yellow grains. Large ears and smooth grain. Yields heavily. A vigorous grower. Price: Pkt. 9c; 1/2 lb. 20c; 1 lb. 30c; 3 lbs. 75c, postpaid.

AT LAST! GENUINE BABY GOLDEN
191 **BABY GOLDEN**. (85 days.) At last I have succeeded in getting some of the genuine Baby Golden popcorn. It took me years to get a stock of it worked up. It's been quite a job but I have the real thing now. Baby Golden has a squirrel tooth kernel, the ears aren't much bigger than my big finger and it's the "poppingest" popcorn I ever had. No hulls whatever, sweet and tender. Price: Pkt. 10c; 1/2 lb. 20c; 1 lb. 35c; 3 lbs. 90c, postpaid.

JUMBO PEANUTS

218 Great big kind. Plant them the same time you plant beans. Not as early as the Early Northern but you are reasonably sure of a crop here in this section. Price: 1/4 lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

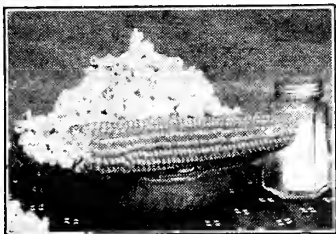

NEW HYBRID JAP HULLESS

193 (100 days) Absolutely the last word in popcorn. Originated by Minnesota Experiment Station and has a 16% greater yield with a popping volume more than 29% over the ordinary kinds of Jap Hulless. That means a lot more eating and you just can't beat Jap Hulless for flavor and tenderness. Supply limited. Price: Pkt. 10c; 1/2 lb. 25c; 1 lb. 45c; 3 lbs. \$1.25, postpaid.

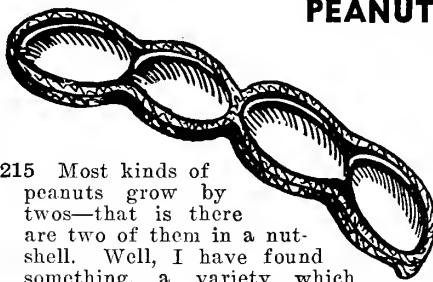

195 **JAPANESE HULLESS**. (100 days) Recognized for years as the standard variety of popping corn. Pops out snowy white, very tender and without annoying hulls. A sharp pointed, deep grained corn, with short chunky ears. Price: Pkt. 10c; 1/2 lb. 20c; 1 lb. 30c; 3 lbs. 75c, postpaid.

THE NEW SUPER GOLD

198 (110 days) I've grown popcorn since I was a boy. It's still one of my favorites. Every time I hear of some new, I get it. Super Gold was originated by the Kansas College. It has everything—volume—most thirty to one. Practically hullless. Color—a rich creamy yellow; yield—better than the best of them. Vigorous and drought resistant. Price: Pkt. 10c; 1/2 lb. 20c; 1 lb. 30c; 3 lbs. 75c, postpaid.

NEW! DOUBLE JOINTED PEANUTS

215 Most kinds of peanuts grow by twos—that is there are two of them in a nut-shell. Well, I have found something, a variety which grows down in Tennessee with three or four nuts in every shell. So we have called them Double Jointed. They are prolific growers, do just fine, we had a lot of them here in the trial grounds this year and I wish everybody would plant them, especially the boys and girls. Price: 1/4 lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

EARLY NORTHERN PEANUTS

219 The early peanut for the Midwest. Small, well filled pods with lots of them on the vine. Will ripen anywhere in the corn belt as they are early and like our soil. Price: 1/4 lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

HARDY PEACHES

ABOUT PEACH TREES

I've watched peach trees and crops a good many years. Some varieties are pretty sure bearers and some aren't worth a rap. You can be sure I'm not offering you shy poor bearers. Listed on this page are the varieties I plant and believe in.

Plant 15 feet apart, or 190 trees to the acre. Plant peaches as fillers in your apple orchard. All my trees are big, soon-to-bear, heavy rooted and I've priced them right. Dates given after varieties approximate ripening date. This may vary according to weather conditions.

PEACH VARIETIES NOT PICTURED

CHAMPION. (White freestone.) Very hardy in the central states. Has size and quality. A honey-sweet, rich, juicy white peach you'll rave about. Ripens around August 10th. White peaches are always hardiest.
GOLDEN JUBILEE. (Freestone.) Beautiful new red and yellow with good size. Hardier than most and growing more popular each year. Flesh is yellow, tender, juicy and sweet. July 20th.
HEATH CLING. (White cling.) Best to preserve or pickle whole. Late in ripening and keeps extra good. September 25th.

J. H. HALE. (Yellow freestone.) Extra large, rich yellow, blushed red with smooth (not fuzzy) skin. Ripens a few days ahead of Elberta and tastes as good as any peach known. A money maker if you want to sell the fruit as it brings a premium.
MAYFLOWER. (White semi-cling.) The earliest peach to ripen and really popular because it is the first fruit. Fruit medium size and a beauty with crimson colorings. Often called "Frost Proof" because it blooms late enough to miss the frost.

HANSEN'S HARDY HYBRID PLUMS

Bear Heavily and Come Into Bearing Early. Absolutely Hardy.

These are the famous hybrid plums of Prof. Hansen. He developed them for the severe Dakota weather, so they will stand any degree of coldness.

Bear very heavily, branches often break with fruit. Come into bearing early—often 1st yr. after planting.

The Fruit is delicious. Try them all if you can.

WANETA—Pictured Above

The most famous of all Hansen's Hardy Hybrid plums. Fruit big, bright red outside and crisp, juicy, sweet yellow inside. Heavy bearing, sure bearing and superhardy.

OPATA—Bears 1st Year

Bears often the year after planting. Reddish purple skin, yellow inside. Limbs are almost entirely hidden by clusters of fruit—so heavy you must watch you don't break the limbs. Grows on any soil. Ripens 10th of July.

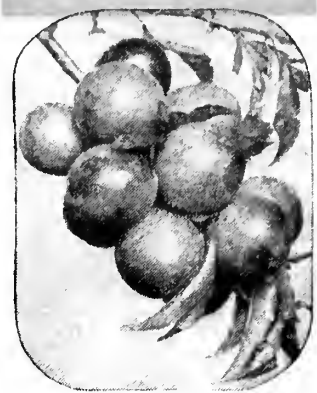

SAPA—Beautiful Color When Canned

Fruit dark purple outside, wine-red inside. Rich flavored. Extra fine too for canning, sauce or jams, or for eating fresh from tree. Like Opata, bears early and heavy. Trees often produce blooms in the nursery row. Pit small and on account of rich wine red color, makes a beautiful sight when preserved, or for sauce. Plant Compass as a pollinizer. Bears right after Opata.

HANSKA—The Big Freestone

(Apricot Plum.) Big, reddish purple plum with sweet apricot perfumed yellow meat. Freestone. Bears right away after planting. Ripens in August.

WHY FIELD'S SHRUBS ARE BETTER

SELECT PLANTS. Big, healthy roots with lots of branches like I've always furnished.

EXTRA SELECT. Cream of the crop with extra big roots from good growing condition and lots of branches.

THIRD GRADE. Thrown away. Not fit to mail. (DON'T BUY this grade somewhere else. Not fit.)

All my lawn seed comes from hardy northern fields. This means it starts quicker, is hardier and more vigorous. I harvest all my lawn seed myself to be sure the fields it comes from are absolutely the best there are.

ALL MY SEED TRIPLE CLEANED

All my seed is carefully cured to make it HIGH-GERMINATING. Then it's TRIPLE-CLEANED to insure ABSOLUTE PURITY.

BUY GOOD SEED

I have been astounded to see lawn seed sold in some stores. It's ½ seed and ½ sawdust, dead seed, and chaff. It pays to buy good lawn seed direct from a seedsmen—especially when it costs YOU LESS. Even if it cost more it would be cheaper than the chaff mixture I've seen!

HOW TO SOW A LAWN

Get out real early in the spring, rake your lawn good, sow your seed and roll it in with a heavy roller, or rake it in LIGHTLY and tramp it in solid.

Sow 1 lb. for every 200 square ft. of new lawn and 1 lb. for every 400 square ft. of old lawn (to thicken).

NOTE: EARLY SEEDING IS IMPORTANT. IF YOU LIKE, SOW YOUR SEED ON THE SNOW. The freeze and thaw WILL WORK IT IN the soil for you.

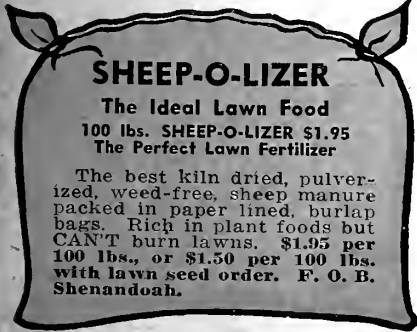

My Famous "20 DAY" LAWN GRASS MIX

This is my famous mixture—blue grass and other grasses and clovers in just the right proportion to give you permanent, dark green lawn in less than 20 days.

MY CHINESE ELM WINDBREAK SPECIAL

30 Big 3½-Foot Trees 98c—FREE: 1 Hansen's Bush Cherry

That's Alfalfa John out at our No. 10 farm looking over our Chinese Elms growing there. Those were 6" seedlings when set out and the same season went way over 6 ft. That kind of growing makes **QUICK, TIGHT WINDBREAKS**. The special windbreak offer above is postpaid and will give you the same quick growth.

HOW TO PLANT WINDBREAK

Plant, if possible, 100 to 150 feet away from the house for best results. Plow a deep furrow where trees are to go and tamp seedlings in furrow carefully. Haul some water to the trees, if you can. Trees should be 6 to 8 feet apart in rows 8 to 10 feet apart for best results. Plant in staggered (zig-zag) fashion for best protection. The important thing is to **PLANT EARLY**. They'll do much better for you if you do.

USES OF EACH VARIETY

CHINESE ELM—For quick windbreak clear to the ground, drought resistant.

BLACK LOCUST—Best to prevent soil washing. Used by the Government.

OSAGE ORANGE—For windbreak and fence posts.

MULBERRY—Grows fast. Good fruits.

HONEY LOCUST—Long lived.

PEACH SEEDLINGS—Orchard and windbreak all in one.

Ideal for Dry Land
Here is the mixture for dry land that you have been waiting for. Farmers who sowed it last spring were very enthusiastic over its ability to withstand drought. Gets along with very little rainfall and keeps coming on all season long.

OVER 40% BROME
Cheaper Than Brome

Contains over 40% Brome Grass with other hardy native grasses such as Blue Stem, Grama, Crested Wheat Grass and Slender Wheat Grass and others that do so well in the drier sections of the United States. Makes you real money because all live stock like it. It's good the year round as it makes a firm sod good for winter pasture.

HOW TO SOW

Sow 12 to 15 lbs. per acre early. Roll in well on a firm seed bed. Add 5 lbs. of alfalfa to the acre if you wish. It will increase the protein content and you can pasture alfalfa with no fear of bloat.

Only **\$5.85** Per Bu.
Sows 3 to 3½ Acres

MY FAMOUS LOT "50-50" Permanent Hay and Pasture Mixture 50% CLOVERS—50% GRASSES

Only **\$4.95** Per 45 lb. bu.

There is always grass coming along to give green pasture even in the heat of the summer.

15 TO 20 TONS FODDER PER ACRE with

ATLAS SORGO

The Giant Fodder Crop
The most sensational forage crop I've ever seen. Enormous producer. Outyields corn for fodder 3 to 1 and makes 15 to 20 tons fodder or silage per acre. Grows giant size—often 12 ft. tall.

Lives Anywhere
Atlas seems to love drought. Even if corn is severely dried up, Atlas stays green and makes a huge crop. Grasshoppers and Chinch bugs don't like it. Atlas sown around cornfields help keep grasshoppers, chinch bugs, and hot winds away from the corn.

A Perfect Feed
Atlas is a perfect feed as it is a cross with a Sweet Sorghum, is sweet so cattle like it. They'll leave feed to get it. Very nutritious. 40 to 60 bu. grain per acre.

HOW TO SOW
Sow 8 to 10 lbs. per acre with large corn plate running full speed. The more you sow, the finer the stem. Don't get over 1" deep. Plant single rows same distance as corn. Harvest with corn binder.

BUY ONLY CERTIFIED OR AFFIDAVIT ATLAS

Much Atlas Sorgo sold is poor germinating and contains hybrids and mixtures dangerous to cattle. Don't take a chance on that seed. I sell and want you to buy only STATE CERTIFIED AND SEALED Atlas or AFFIDAVIT ATLAS Grown from our Registered Seed. It's high germinating, free of mixtures and smut. It costs less than 40¢ per acre to sow Atlas. No sense taking a chance with certified seed so cheap. See price right.

Genuine-Sealed State-Certified Atlas

The finest, purest seed, absolutely free of mixtures and hybrids. High germination. **\$5.00** Per 100 lbs.
\$2.75 for 50 lbs.
\$1.50 for 25 lbs.

ATLAS IS SCARCE

High Germinating Atlas that will grow is scarce this spring. So buy early and buy good seed. Poor Atlas is expensive even if given away.

Affidavit Atlas Grown from Registered Seed

This is Atlas grown from our registered seed sown last spring. Clean, pure, high-germinating. **\$3.25** Per 100 lbs.

CERTIFIED SUDAN NO. 23

Leafier—Heavier Yielding—Free of Hybrids

Sudan No. 23 is the new, absolutely pure, certified Sudan. The tallest, most leafy, heavier growing, and true to type plants have been selected to make this strain. It actually yields from 25 to 40% more tonnage per acre than ordinary Sudan. FREE from all cane hybrids making a Sudan that you can pasture without danger to your livestock no matter what kind of weather we have. Put up only in 100 lb. bags at the special low price of \$5.95 per hundred pounds. (Last year sold for \$10 per 100 lbs.)

Now Only **\$5.95** Per 100 lbs.

REGULAR SUDAN—

All High Quality—New Crop Seed

This is beautiful seed—98% to 99% pure Sudan, absolutely noxious weed free. Heaviest, plumpest, selected Sudan available. Johnson grass and noxious weed free, of course.

Sow Sudan for Midsummer Feed
Sudan is the answer for summer pasture. Resists drought, stays green during the hottest months of the year. Is a life saver on thousands of livestock farms.

How to Sow

Sow after corn planting time. Drill in close rows or broadcast using about 25 to 30 lbs. per acre. Cover not over 1 inch in depth and pack the seed bed well.

Enormous Yields

Besides carrying more head of livestock per acre than any crop that I know of, Sudan yields 4 to 10 tons of hay per acre. High in feeding value. First hay crop in 60 days and the second crop about 6 weeks later—just before frost. Every farm needs a patch.

\$3.25 Per 100 lbs.

WARNING

Don't fool around with low germinating on local grown Sudan. It isn't worth what it costs at even one-half price. Buy this high quality guaranteed seed. It costs you less.

REED CANARY GRASS

The Grass for Wet Land
Also Good Drought Resister

Farmers everywhere find Reed Canary the best grass for low wet ground. They find it also stands the drought in splendid shape.

Makes better hay and outyields Timothy 3 to 1. Livestock of all kinds thrives on Reed Canary—a good source of protein nourishment. Extra fine for pasture and hay. Has lots of leaves on it. It starts early in the spring, continues growing later than most any other grasses. Seed 5 to 8 lbs. per acre on a good seed bed early. Seed is the lowest this year that it has ever been. A good year to start growing Reed Canary.

Only **\$2.20** Per 100 lbs.

EARLY GIANT LESPEDEZA (U.S.D.A. No. 19604)

Only **\$3.75** Per bu. 25 lbs.
\$15.00 per 100 lbs.

Giant Crops

This is the new Giant Lespedeza—Larger and heavier yielding than common strains making it ideal for folks in Ia., Ill., Ind., and Ohio who need an early type.

GROWS ANYWHERE

Especially valued where other legumes will not grow. Will grow on the sourest soil and will build it up by adding nitrogen.

HOW TO SOW

Sow on a firm seed bed early without a nurse crop. Mostly drilled covering a half inch deep using about 12 lbs. per acre.

TIMOTHY-ALSIKE MIXTURE 20 to 25% Alsike

This is a natural balanced timothy-alsike mixture which I purchased below the market. We have two cars of this seed and are offering it at very little more than the regular timothy price. Only \$3.45 per bushel of 45 pounds. Enough to take care of 4 acres of good pasture and meadow seeding. The timothy and the alsike both will germinate better than 90% and of course this lot is free of noxious weeds and it is bright, plump new crop. Only \$3.45 per bushel of 45 lbs.

Only **\$3.45** Per bu. 45 lbs.

MEADOW MIXTURE 50% Clover—50% Timothy Mixture

This Super rich mixture makes an ideal seeding. Half Red Clover, Alsike and Alfalfa. You ask how can Henry Field make such a price. It is only because we purchased a nice lot of this seed from the farmers in Minnesota early. Bought it worth the money and are passing it along to you on the same basis.

Makes Good Pasture Too

With the timothy to provide the roughage it makes a pasture that is free from bloat also. Sow alone or with your regular oat seeding if you prefer. Just see that the seed is rolled in and success is assured. Sow 10 to 12 lbs. per acre. Special price only \$4.35 per bushel of 45 lbs.

Only **\$4.35** Per bu. 45 lbs.

9 REASONS Mule-Hybrid Corn IS BETTER

BIGGER YIELDS 10 to 20 bu. per A more

Mule-Hybrid consistently makes records of from 10 to 20 bu. per A MORE corn than ordinary corn. That means real money to you.

DROUGHT RESISTANT

The Giant root system of Mule-Hybrid goes deep down for moisture. Heat and drought has not stopped its phenomenal performance.

STIFF STALKS

Mule Hybrids have stiff stalks. Prevents loss from high winds, keeps stalks standing straight and is much easier to pick.

UNIFORM CORN

Mule Hybrid is uniform corn with ears placed uniformly low. Easier to pick—often saves as much as 1c per bu. picking costs.

HIGH FEEDING VALUE

Mule Hybrid is high in oil and protein and low in starch. Feeds pork and beef cheaper and easier. Ears large, rugged Reid type—not flinty.

DISEASE RESISTING

Mule Hybrid is bred against root rot and is practically free of disease. Does that mean anything to you?

HEAVY GREEN FOLIAGE

Mule-Hybrid has heavy green leaves clear to the ground. They stay green long making much better ensilage than ordinary corn.

92% GERMINATION GUARANTEED

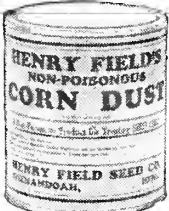

All Mule-Hybrid is carefully dried down to 13% moisture, shelled and graded, and guaranteed to germinate 92% or better.

ALL MULE-HYBRID IS TREATED WITH CORN DUST TO PREVENT DISEASE

CORN DUST

Prevents disease and helps to increase your yield about 4%. Also protects your seed from squirrels, rodents, etc. 1 pound treats 5 to 8 bu. of seed. 1 lb. can \$1.00, postpaid.

OTHER CORN

Yes, I have open-pollinated corn too. It's as good as ever and priced on enclosed price list. I recommend it as follows:

NORTHERN IOWA, SOUTHERN MINN. and SOUTH DAKOTA—Plant Minnesota 13 (yellow), Early Pride Of The North, (yellow), Early Silver King (white), Golden Glow (yellow).

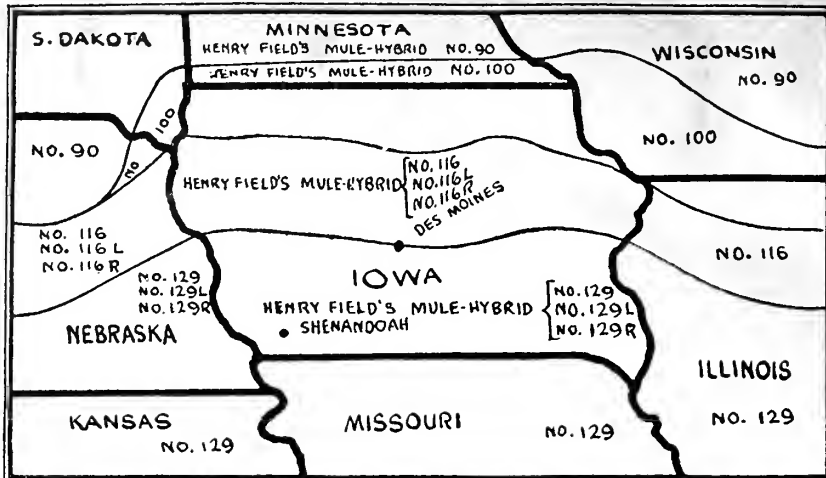

CENTRAL IOWA, NEBRASKA and NORTH ILLINOIS—Plant Pfister's Krug (yellow), Reid's Yellow Dent, Golden King.

FOR SHENANDOAH, LIKE TERRITORY—Krus's Gold Mine, Reid's Yellow Dent, Silver Mine, St. Charles Red Cob, (white), White Elephant and Field's Unity.

LATE VARIETIES—Shenandoah Yellow, Boone County White, Yellow or White Ensilage.

MULE-HYBRIDS "MADE-TO-ORDER" FOR YOUR FARM PLANT ADAPTED HYBRIDS ONLY

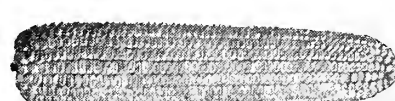

—For South half Iowa, Central and South Illinois, Southern Nebr., Eastern Kansas and Missouri

MULE-HYBRID NO. 129

Improvement Over 125

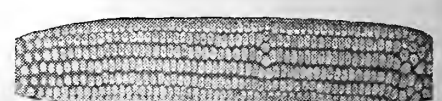

My most famous hybrid—the HEAVY and SURE YIELDER. The 2-ear hybrid. Made 92 bu. per acre in our planting against 50 bu. for open pollinated. Outstanding in checks in other states—IOWA 80 bu.; Missouri 112 bu.; Illinois 123 bu. per acre. Very drought-resistant. A tall strong grower. Widely adapted to almost all soils, does best on average soil.

MULE-HYBRID NO. 129L

Takes Place of 123

The largest kernalled, big ear hybrid. Suckers some on rich soil. Made for light, thin soil where it is a famous yielder. Likes medium-light soils too, but will produce big crops on clay hills or on hard pan. An outstanding hybrid for much of southern Iowa and northern Missouri. Ordinarily outyields ordinary corn 20 to 30 bu. per acre. Bred for drought resistance. About 120 days.

MULE-HYBRID NO. 129R

This is the cold-resistant hybrid. Stands up extra-well and outyields everything it has been up against here except 129. On extra-rich soils it has even outyielded No. 129. Every stalk has a big ear on it. I consider it better than Iowa 13 in every way. For rich heavy soil.

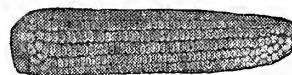

About 120 days to full maturity.

—For Central Iowa, up to two top rows of Counties. Northern Nebr. and Illinois, South East South Dak.

MULE-HYBRID NO. 116

Has consistently out-yielded Krug's and Reid's here by 15 to 25 bushels per acre. Drought resistant. Regular "Ramrod" corn—never lodges or falls over. Big ear on every stalk. For average soil.

MULE-HYBRID NO. 116L

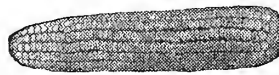

You can plant this early as it is cold-resistant. A very heavy yielder—yields of 110 bu. per acre not unusual. Rich in oil, protein makes good feeding corn. Likes medium-light soil. Drought resistant and very disease free. Matures 110 days.

MULE-HYBRID NO. 116R

Heavy yielder. Very similar to 116 but likes rich soil. Matures 110 days. In checked tests has given from 21 to 37 bushels more per acre than ordinary corn.

HIGH YIELDING MULE-HYBRID FOR THE NORTH

Henry Field's MULE-HYBRID NO. 100

The sure-fire, early-maturing hybrid for the north. You can always depend on it. Yields ordinarily 10 bu. more per acre than ordinary corn. Stands up well. Rich, yellow ears 8 to 10 inches long.

ADAPTED:—North 2 tiers of counties IOWA, southern row of counties MINNESOTA, southeastern SOUTH DAKOTA, southern WISC. 100 days.

Henry Field's MULE-HYBRID NO. 90

This is the high-yielding yellow corn for the north. Outyields even Minnesota 13 by 6 to 10 bu. per acre. Matures in 90 to 95 days, with good ear on every plant.

ADAPTED:—Central MINNESOTA, WISC., S. DAKOTA, OKLAHOMA, Northern TEXAS, Southern KANSAS and Southwest NEBR. 90 to 95 days.

State-Certified Hybrids—(If You Want Them) At Lower Prices Than Usually Asked

Don't Miss Out! PLANT AT LEAST SOME MULE-HYBRID THIS YEAR

If you haven't planted Mule Hybrid before I'm not asking you to buy all your corn from me. I only want to furnish most of your needs and let you compare it with any other Hybrid you can dig up. MULE-HYBRID SPEAKS FOR ITSELF IN BETTER YIELD and BETTER CORN. Don't miss cashing in on this champion money maker.

Germination 92% or Better GUARANTEED! Extra Fine Grading

This Mule-Hybrid corn of ours is the finest quality it is possible to produce. All carefully graded to flat edge drop, with moisture content under 13%, it is absolutely guaranteed to germinate 92%, or better and you do the testing or send it to the state for their test. Hill drop grade also available at even lower prices.

YOU MUST BE SATISFIED OR NO TRADE

I'm standing back of this corn. If you're not entirely satisfied when you receive the shipment—don't like the corn or the looks of the bag or it doesn't suit you in some particular—send it back and your money will be promptly refunded. This corn is bound to please you. That's why I can write a guarantee like this.

WHAT VARIETIES TO PLANT

The description of varieties and map showing the right MULE-HYBRID for your farm is on the opposite page. You can find the correct numbers there or, if you wish, just send your order and I'll pick the correct hybrids for you. I recommend you divide your planting between 2 or more MULE-HYBRIDS. One season makes one hybrid yield more and another season makes the other hybrid yield more. It's insurance on the biggest crop possible.

ONLY 50c PER BU. DOWN!

This time of the year, most of us farmers are a little short of cash. That's why I'm asking only 50c per bushel down payment to hold your corn for you at these very low opening prices. Send your reservations now WITH ONLY 50c per bu. just to bind the bargain on both of us, so I'll stay hitched. Pay the balance just before the corn is shipped, March 1st. That's fair, isn't it? Tell your friends and neighbors, too.—H. F.

FREIGHT PAID!

Don't let anyone tell you freight on corn is expensive. It isn't. Just to prove it, for 25c per bushel on my Mule-Hybrid corn, I'll pay the freight anywhere in Iowa, Missouri, Kansas, Illinois, Minn., and Nebraska. And for 50c per bushel, I'll pay the freight into any other state. Just add that amount per bu. to your order and say, send freight paid.

GUARANTEED STAND!

For only \$1.00 per bushel extra, I'll GUARANTEE YOUR STAND OF CORN AND PAY THE FREIGHT TO YOUR TOWN. Even with this stand insurance added, your corn costs little more than open pollinated corn and way less than other hybrids.

Here's Proof MULE-HYBRID LEADS THEM ALL THE COUNTRY OVER!

Best of 5 Hybrids

"Dear Henry: We planted four other hybrids and some open pollinated this year, and Field's Mule Hybrid proved the best by the test. It made over 70 bu. to the acre, stood up well and the ears hung on."—John V. Starr, Greenfield, Iowa.

20 Bushels More Per Acre

"Dear Mr. Field: I had 15 acres of your No. 129 Hybrid, and it made 20 bu. per acre more than my open pollinated corn. It stood the drought better, stood up straighter, shucked easier, and the chinch bugs didn't bother it. As long as I plant Hybrid corn, it will be Henry Field's. It can't be beat."—Eee Riepe, Griswold, Iowa.

70 Bu. Per Acre

"Dear Mr. Field: I planted 80 acres of your corn this spring, and it was the best corn I raised out of a total of 145 acres of corn. I got 70 bu. per acre, it stood up wonderfully well and was entirely free of the corn-rot that existed in my other corn. My hybrid was easily husked, and scarcely an ear on the ground."—Lon Osler, Iowa.

2 Ears Every Stalk

"Dear Mr. Field: Yes, I'm certainly proud of my Mule Hybrid. There were two ears on every stalk—yielded 70 bushels to the acre—and stood up like a tree. No wind could blow it over, and it would break off first before it would pull up."—Jim Long, Dayton, Iowa.

129½ Bu. Per Acre

"Dear Mr. Field: That Mule-Hybrid seed corn we bought from you last spring, No. 129, all was tops. One field of 8 acres of Government Measure, yielded 1,036 bu. and 50 lbs., or an average of 129½ bu. per acre. Needless to say, we are planting your corn next year."—F. E. and John W. Owens, Imogene, Iowa.

Minnesota Likes It

"Dear Henry Field: I planted Mule-Hybrid on poor upland ground, along with three other hybrids and one open pollinated. A hard wind after the ears were heavy broke off many stalks in all three hybrids, but the Mule Hybrid stood right up and yielded 80 bu. per acre."—Fred Draut, Sherburn, Minn.

Outyields

Other Hybrids

"Dear Henry Field: I planted 6 bu. of Field's Hybrid beside three other hybrids and open pollinated corn. Your hybrid made 80 bu. per acre on thin hill ground; my own corn made 40 bu., and the other hybrids made 60 bu. You can count on me planting all Field's Hybrid next year."—Lloyd Hartstack, Hepburn, Iowa.

Mule-Hybrid Wins Another Test

"Dear Mr. Field: In comparison with two other leading hybrids, grown on the same ground under the same conditions, your corn made 10 bu. per acre more than the other two. All three stood well but yours shucked the easiest and the quality was the best of the three."—Ross Ackerman, Griswold, Iowa.

Mule-Hybrid Stands Up Better

"Dear Mr. Field: Your hybrid corn grew faster, its color was darker green, it stood the dry weather during July and August much better than my open pollinated which was right beside it. At harvest time about 90% of the open pollinated corn was on the ground, and only 5% of the hybrid was down. The corn was free from smut and rotten spots and was superior in feeding quality."—E. W. Nickelson, Elk Creek, Nebraska.

MULE-HYBRID CORN Means Extra Profits for You

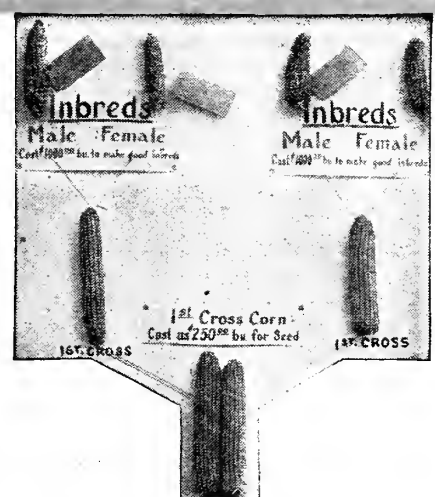

Extra Profits from Mule Hybrid As High As \$1500 Reported

My Mule-Hybrid corn yields from 10 to 30 bushels MORE PER ACRE than open pollinated corn. That's why extra profits from Mule Hybrid as high as \$1500 have been reported. That's extra corn over the usual yield.

Think of it. No more acreage. No more expense. No more work—except picking the extra corn. Even if you got only 10 extra bushels per acre, that's 800 extra bushels on an 80 and at 50c per bushel, that's \$400 EXTRA PROFIT.

MULE-HYBRID Result of Generations of Careful Breeding

Hybrid Corn Is No Better Than Its Family Tree

By inbreeding the best qualities of a corn are kept and the poor ones left out. The finished corn is no better than these inbreds. That's why it's important to buy corn grown from good inbreds—the corn with the good family tree. Henry's Mule-Hybrid corn is Quality Corn—bred to give you big yields of rugged, giant corn.

MULE HYBRID The Leading Feeding Hybrid

Farmer Style Corn

- ★ LARGE EARS—NOT FLINTY
- ★ HIGH FEEDING VALUE

Lots of farmers have told me they find fault with hybrid because it's too hard. That's because they have the wrong hybrids. My MULE HYBRIDS are not FLINTY HYBRIDS. They are big, rugged, farmer-style hybrids, big as Reid's or bigger. They are bred for a high yielding feeding corn high in feed value. Mule-Hybrid is high in oil and protein to make more pork and beef at less cost. If you want the best in feeding corn and want the EXTRA yields of Hybrid corn, plant my Famous MULE HYBRID.

Don't Pay More for Chicks!

It's the breeding and inspection behind the chick that counts—AND I GIVE YOU CHICKS FROM SOME OF THE MOST CAREFULLY SUPERVISED FLOCKS IN THE COUNTRY. It's the best and costs you less.

Better Breeding—Careful Culling and Blood Testing Make Field Chicks More Profitable!

The superiority of Henry Field Chicks doesn't just happen. It comes from careful, planned, expensive breeding. All my flocks are regularly inspected by my own inspectors under the direction of Judge Leon Smith. ALL BIRDS are carefully CULLED, WORMED, and BLOOD TESTED and no bird that fails to measure up to our highest standard is left in the flock. This careful breeding means HEALTHIER, MORE VIGOROUS, MORE PROFITABLE CHICKS FOR YOU.

Field's Up to 300 Egg Blood Means More Profit for You

A 200-egg hen makes 6 times the profit of an average hen. That's why Henry Field chicks with 200- to 300-egg blood bred into them through generations are bound to be better money makers and larger egg producers. IT COSTS AS MUCH TO RAISE A SCRUB CHICK AS A GOOD PRODUCER. Buy the best and save money.

SEXED CHICKS — BUY ALL PULLETS FOR LAYING FLOCKS BUY ALL COCKERELS FOR BROILERS

WHY SEXED CHICKS MAKE YOU MONEY

Nowadays 50% of the chicks we send out are sexed. This way folks don't have to raise 1,000 chicks to get 500 of the kind they want. They buy them sexed and get all of the sex they want.

Those wanting broilers buy all cockerels. Cockerels raised alone develop faster and get on the market sooner copping the top prices.

For a laying flock—buying all pullets raises you twice as many layers in the same brooder house in which you used to raise 1/2 as many.

Henry Field Guarantees 95% Pullets

Most hatcheries guarantee only 90% accuracy in sexing. I guarantee my pullets to be 95% true to sex which means 5 extra pullets per 100 for you. It is very common for my pullets to run 100% true to sex. Why accept less?

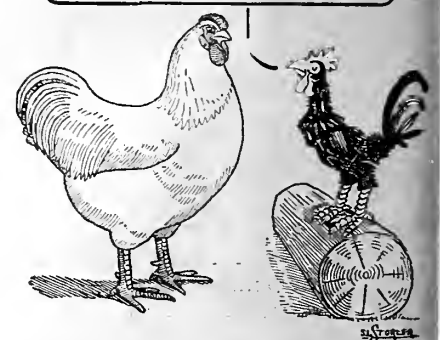

Original Jap Method Used in Sexing

We use only the original Jap method of sexing which we have found does not harm the chicks in any way and is much higher in accuracy. This costs much much more but the extra accuracy and care is worth it. Often times 100% with no mistakes at all. Insist on your baby chicks being sexed the Jap method.

FIELD'S HYBRID CHICKS MAKE AMAZING PROFITS!

Red Rock Hybrid
The Yellow-Skin Market Cross

This is one of the oldest and is one of the most popular dual purpose Hybrids. They are faster maturing and I recommend this cross above all others for heavy market purposes. Both the Barred Rocks and the Rhode Island Reds used in this cross have the fine yellow skin which is ideal for market purposes.

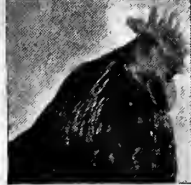

Leg Rock Hybrid
The Hybrid Egg Cross

By mating some of my outstanding White Leghorn males with some of my fine White Rock females I am producing the Leg Rock Hybrids. Combining all the good points of these two great breeds gives you a bird that has all the size of the White Rocks and the egg laying ability of the White Leghorns. They are faster maturing and when mature the hens resemble the White Leghorns and the males the White Rocks. Easy to raise for they are more rugged and disease resisting than some other breeds.

Leghorn Minorca
Cross

Sometimes Called Legorca
The Leghorn Minorca cross is the most popular for people wanting an abundance of large white eggs. This cross gives you a white chicken larger than the White Leghorns, with plenty of health, and vigor to mature faster and to get into production quicker. The laying flock can be kept on less feed than some other varieties, and your laying flock mortality will be much less in most cases.

Hamp Rock Hybrid
Ideal for Meat Purposes

New Hampshires crossed with the Plymouth Rocks make an outstanding Hybrid. By combining the old with the new I can produce a Hybrid that has all the good qualities of this fine old breed plus the fine qualities of the New Hampshires. They are faster maturing, faster feathering, weigh heavier, live better, and lay more eggs than most any of the heavy breed crosses. You will find they have a beautiful light barred plumage, and resemble the Barred Plymouth a great deal.

ALL HYBRIDS ARE PROFITABLE

Just like hybrid corn and hybrid hogs are more profitable than purebreds—so hybrid chicks are more profitable than purebreds. Nowadays, everyone is turning to hybrid chicks to make more money than they ever have before from chicks.

HYBRIDS GROW FASTER

Hybrids—both pullets and males grow much more rapidly than pure breeds and get on the market sooner.

PULLETS LAY SOONER

Because they grow so rapidly, pullets start laying much earlier than pure breeds and lay larger eggs to start.

HYBRIDS ARE HEALTHIER

Hybrid chicks are resistant to disease and resist the colds and disease that sets purebreds back so much.

PULLETS LAY MORE AND LARGER EGGS

Hybrid pullets produce much more than purebred hens and the size of the egg is much larger.

COCKERELS GET ON MARKET SOONER

Hybrid cockerels grow faster, are more vigorous and get on the market earlier—getting the top prices.

BEST BROILER HYBRID—CORNISH LEGHORN CROSS

My Cornish Leghorn Cross is just what you want to produce a two pound broiler in from 8 to 10 weeks. Both males and females have white plumage and are very easy to dress. They have excellent

breast development at two pounds and the breast meat is very white and thick and of excellent quality.

The pullets make very good layers and will lay very early.

Henry Field's up to 300 Egg Blood MASTER WHITE LEGHORNS

Leghorns Are Profitable

For many years the White Leghorns have been recognized as the heaviest producers of white eggs. They require less feed and less room per bird than almost any other breed. You will find my White Leghorns large type (not beefy) full of vigor and are great rustlers. Constant culling and flock managing combined with good parent stock insures you the kind of Leghorns that will make you the most money.

BUY Leghorns with Care

Some folks think ALL Leghorns are heavy egg-layers. That's not true. I think 100 eggs

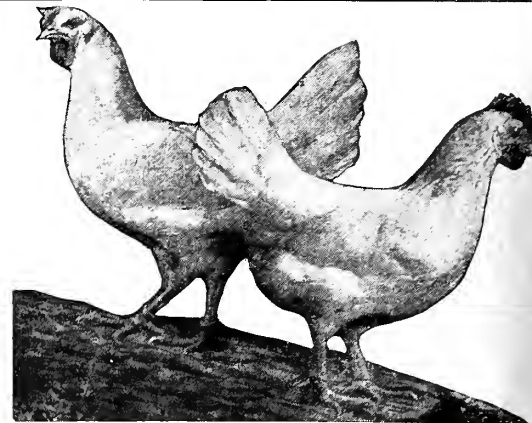

per year is nearer the average for ordinary leg-horns.

That's why it's important you get Henry Field Bred-To-Lay Leghorns with up to 300-egg blood. Even if they cost you 5c more per chick (which they don't) they pay that back many times over in EXTRA EGGS.

If you are short of room in your brooder house, remember you can have more pullets this fall by buying pullet chicks from me, and remember we guarantee 95% true to sex.

Cockerels Ready in 8 to 10 Weeks

You will find the cockerels will be ready to sell in 8 to 10 weeks, and Field's pullets will be ready to lay early.

BUY FIELD'S BETTER-BRED PUREBREDS

Henry Field's Famous Plymouth Rocks—The Dual-Purpose Breeds

BUFF PLYMOUTH ROCKS

For those that prefer Buff chickens, but want the Plymouth Rock Quality, my Buff Plymouth Rocks are just what you have been looking for. They are a beautiful Golden Buff color, and are the same standard weight as the Barred Rocks. They make very good broilers or roasters, and you will find them heavy egg producers.

GIANT BUFF ORPINGTONS
Good Winter Layers

Henry Field's Golden Buff Orpingtons, due to their massive bodies and heavy plumage are ideal winter layers, laying lots of winter eggs when the market is usually highest. As they are one of the heaviest breeds of chickens, the males make very good capons, and have been known to weigh up to 14 lbs. If you are interested in winter eggs, be sure to order some of my Golden Buff Orpingtons.

WHITE PLYMOUTH ROCKS

Henry Field's giant type White Plymouth Rocks have a beautiful snow white plumage, and will dress out at almost any age a rich yellow color free from pin feathers. They are one of the most popular dual purpose breeds due to their meat qualities and their ability to lay a large number of eggs. We have increased their production ability by careful culling, and mating with pedigreed males.

SINGLE COMB RHODE ISLAND REDS
Vigorous Egg Producers

Henry Field's deep dark red Rhode Island Reds are favorites on many farms. They are very strong and rugged, beautiful color and are next to Leghorns in egg production. By careful mating and culling I have developed my Reds so they are fast maturing, and quick feathering and will be ready for the early markets. Many males used in my Rhode Island Red flocks are from up to 300 egg blood.

BARRED PLYMOUTH ROCKS

Henry Field's Barred Plymouth Rocks have proven their money making ability on many farms. They are large in size, very fast maturing, rapid feathering and are excellent layers of large, brown eggs. Many of the breeding males are from hens with proven ability to lay up to as high as 300 eggs per hen in one year. They make fine broilers or roasters and are the ideal dual purpose bird for any farm.

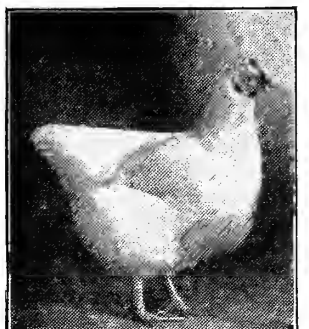

FIELD'S NEW HAMPSHIRE'S
"Leghorn of Heavy Breeds"

Henry Field's New Hampshire's can almost be called the Leghorn of the heavy breeds for they are very heavy egg producers, and combined with their heavy weight they are very hard to beat. They are noted for their fast growth and even feathering. They have the vigor and hardiness of the White Leghorns, and in some places they have replaced the Leghorns.

WHITE WYANDOTTS
Early to Market

Henry Field's deep breasted White Wyandottes are the first to go to market. They will reach from two to three pounds sooner than almost any other variety. They are very good rustlers, and many of my farm friends say they will almost make their own living by finding the waste feed around the farm. Wyandottes are big husky birds, and have proven their egg laying ability on many farms.

Henry Field's WHITE GIANTS
White Giants deserve the name because they are extra-large and grow very rapidly. The Henry Field White Giant makes an excellent cockerel for caponizing, often weighing twelve pounds and more. Good capons bring top prices, that are much above regular market figures. The pullets are good layers and their extra-size makes them desirable in every way.

FIELD'S WHITE MINORCAS
Largest White Egg

The Henry Field's White Minorca is an egg production breed of chicken, larger than the White Leghorn and producing the largest pure-white egg of any variety. The Field White Minorca comes from blood which has held champion egg-laying records year after year. In official opinion, they were proven TO LAY MORE. There's always a ready market for Minorca hatching eggs, because the popularity of the breed makes the eggs scarce and high in price. For MORE PROFITS, I recommend you buy either the Best Egg or Special Laying grade. Also can supply Black Minorcas. See price list.

SPECKLED SUSSEX

Speckled Sussex are becoming more popular in America. If you go into this breed of chicken you will be able to build a profitable hatching egg business. The plumage of the Speckled Sussex is deep rich red, though each red feather is tipped with a pure white nodule divided by a slender black bar. Henry Field's Sussex are big birds, strong of leg and deep of body.

Field's Special Laying Grade

For the poultry raiser who wants a better chick than my standard grade, will find my special laying grade just what you are looking for.

They have been more rigidly culled for standard qualities, and egg production. Many of the cockerels used to mate these flocks are from my best grade.

Only eggs weighing 24 oz. or over set in this grade. Large eggs, rigidly culled and blood tested parent stock makes these chicks outstanding in their class. You get more eggs with the same feed with this grade. These EXTRA EGGS are your profit for buying the better grade.

SECRET FORMULA MAKES DUST SO POWERFUL

The formula of my famous BUG DUST is

don't come close.

The comparatively new and powerful poi-
son, ROTENONE, is mixed with other pow-
erful ingredients to make it the nearest ALL-
PURPOSE DUST I've ever sold. I predict in
3 years nothing else will be sold.

SOLD ONLY BY HENRY FIELD

My "BUG DUST" is for sale only one place in United
States and that's right here.
Beware of imitations. My formula is good as thousands
know. Others may not be.
